

Help Someone who has Allergies Today!

A healthy immune system means high resistance to disease and infection, better ability to deal with stress, and greater health and wellbeing. The most common immune system disorder is the allergy. Allergies occur when the immune system overreacts to an allergen (such as dust, pollen, animal dander, certain foods, etc.) and produces too many neutralizing chemicals (especially histamines) to counteract it.

While not a treatment for allergies, chiropractic releases stress on the nervous system, which permits the immune system to function more effectively.
